

Practical 1 Github actions workflow with docker

This screenshot shows the Visual Studio Code editor with the `ci-cd.yml` file open. The Explorer sidebar on the left shows the project structure: `DEMO1` containing `.github/workflows`, `ci-cd.yml`, `app.py`, `dockerfile`, and `requirements.txt`. The main editor displays the following YAML workflow:

```
1 name: CI-CD Pipeline
2
3 on:
4   push:
5     branches: [main]
6
7 jobs:
8   build:
9     runs-on: ubuntu-latest
10
11     steps:
12       - name: Checkout code
13         uses: actions/checkout@v4
14
15       - name: Build Docker image
16         run: docker build -f dockerfile -t my-flask-app .
17
18       - name: List Docker images
19         run: docker images
```

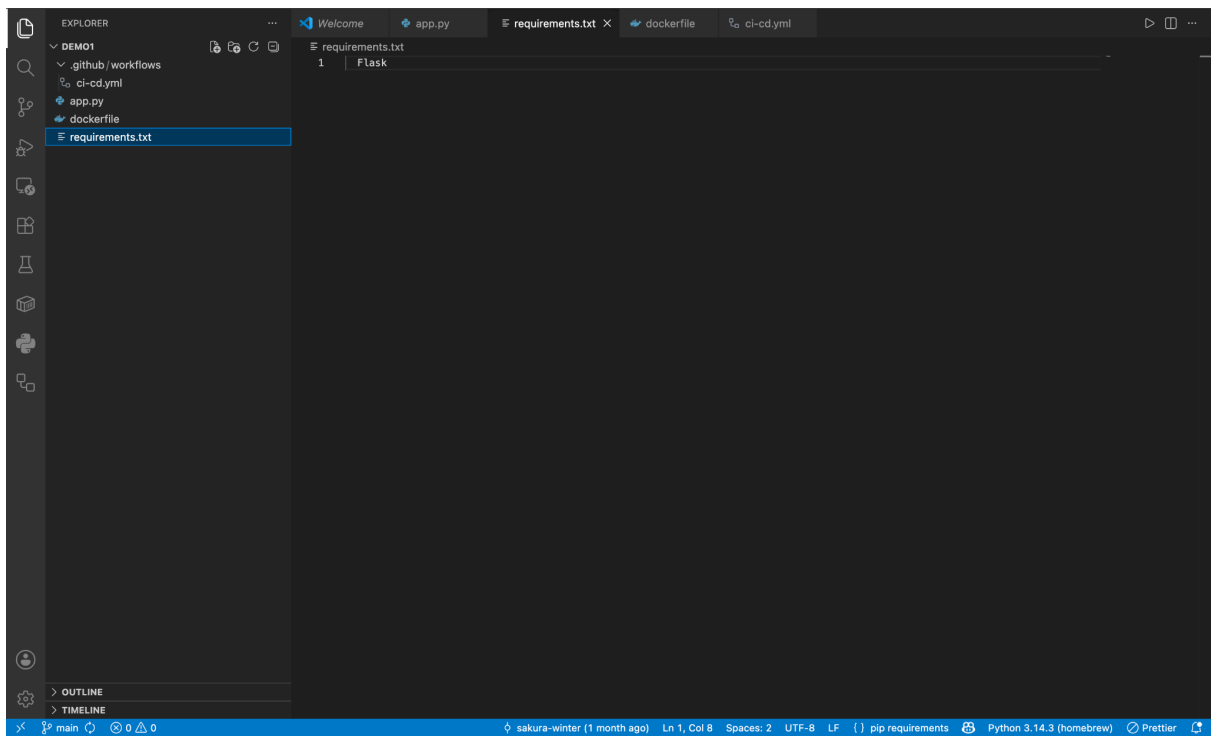

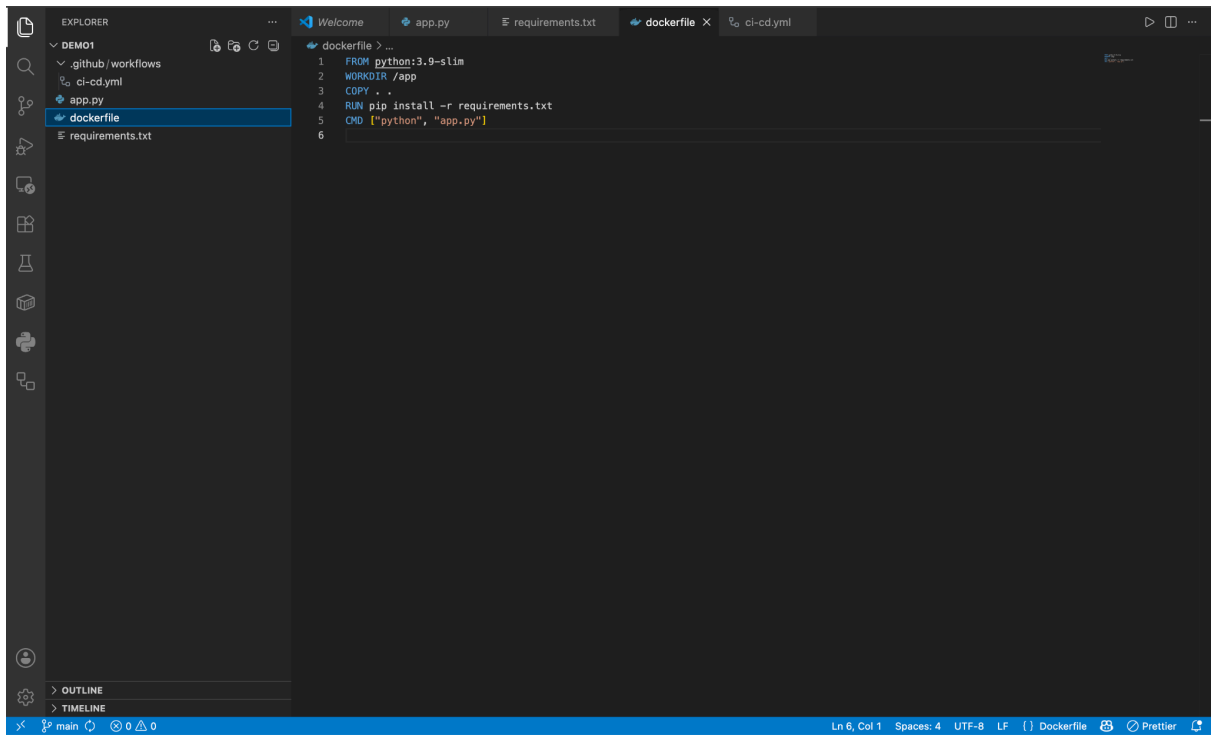

The status bar at the bottom indicates the file is `ci-cd.yml`, located at `Ln 19, Col 27`, with 2 spaces, UTF-8 encoding, and LF line endings. It also shows the GitHub Actions Workflow icon and the Prettier formatter.

This screenshot shows the Visual Studio Code editor with the `app.py` file open. The Explorer sidebar on the left shows the project structure: `DEMO1` containing `.github/workflows`, `ci-cd.yml`, `app.py`, `dockerfile`, and `requirements.txt`. The main editor displays the following Python code:

```
1 from flask import Flask
2 app = Flask(__name__)
3
4 @app.route('/')
5 def home():
6     return "Hello from Docker CI/CD!"
7
8 if __name__ == "__main__":
9     app.run(host='0.0.0.0', port=5000)
10
```

The status bar at the bottom indicates the file is `app.py`, located at `Ln 10, Col 1`, with 4 spaces, UTF-8 encoding, and LF line endings. It also shows the Python interpreter set to `Python 3.14.3 (homebrew)` and the Prettier formatter.
